SUMMARY

I am a passionate and creative BCA graduate with a solid foundation in web development and modern design principles. Now evolving as a Full Stack Developer and AI tool specialist, I bring a versatile skill set that blends frontend finesse with backend logic. I have hands-on experience in building responsive, user-friendly websites that are both visually engaging and functionally robust. My expertise includes Firebase integration, payment gateway APIs, and real-time database handling, enabling me to develop secure and scalable web applications. With strong problem-solving abilities and a commitment to continuous learning, I stay updated with the latest web trends and technologies to craft meaningful digital experiences.

WORK EXPERIENCE

Web Developer Intern , Electrotech Automation

October 2024 - December 2024

I successfully completed a web development internship at Electrotech, where I played a key role in designing and developing dynamic, user-focused websites. During this time, I strengthened my skills in HTML, CSS, JavaScript, and responsive design, while also working with industry tools like Bootstrap (CSS/JS) and the EmailJS API for form submissions and client communication integration. This hands-on experience helped me understand real-world development workflows and sharpen my problem-solving abilities. I focused on creating visually appealing, fast-loading, and mobile-responsive interfaces, aligning with my goal of delivering enhanced user experiences backed by solid functionality.

EDUCATION

Senior Secondary School (11th & 12th)   June 2020- April 2022
Devchand College Arjunnagar, Nipani
- Commerce in Information Technology.

Bachelor of Computer Application   Sept 2022 - July 2025
KLE Society's College of BCA Nipani.
- Bachelors of Computer Application (Web Development & Information Technology).

ADDITIONAL INFORMATION

- **Technical Skills:**

  - **Programming Languages :**
    - HTML/CSS, JS, Python, Php, C, SQL, Java(Intermediate).
  - **Framework & Libraries :**
    - Tailwind CSS, VanilaJS, NodeJS, React.
  - **Tools & Platform :**
    - Git, Github, Firebase, Figma, Canva.
  - **Database :**
    - MySQLDB, MangoDB., ForestoreDB.
  - **Other Skills :**
    - REST API's, Payment Gateway Integration, Responsive Design.

- **Soft Skills :**

  - Communication, Creativity
  - Team Work
  - Time Management
  - Under-Pressure Working

- **Languages:**

  - English, Marathi, Hindi.

- **Certifications:**

  - Java Automation Testing With Selenium.
  - Duolingo English Test (DET) - 105/160 (English Proficiency Test).

- **Awards/Activities:**

  - Secured multiple 1st and 2nd place ranks in web development and coding competitions held at various inter-KLE college events, showcasing strong technical and creative problem-solving abilities.

  - Participated in several national-level hackathons, including a prestigious 48-hour hackathon organized by Sanjay Ghodawat University, where my team ranked in the top 10 out of 135 teams from across different states of India.

  - Successfully completed a one-week certification course on MERN Stack Development conducted at my college. The course covered key concepts of MongoDB, Express.js, React.js, and Node.js, helping me understand the fundamentals of full stack development and how to build scalable web applications.

PROJECTS & WORK

I have built multiple projects both during and outside my college journey, including hackathon-based and self-initiated work. Below are some of the major projects where I applied modern web development technologies:

- **Sports Eligibility Platform (College Project):**
  - A system where athletes can check their eligibility status by making a one-time payment. Once logged in, users can explore details of coaches from 22 Indian states, including names, contact numbers, center addresses, and email IDs. The access remains valid until the user logs out.

- **Women's Empowerment Portal (Hackathon Project):**
  - Developed during a national-level hackathon, this platform empowers women to create personal stores, build professional profiles, join communities, and explore job opportunities — all in one place.

- **Travel Expense Tracker (Personal Project):**
  - A real-time trip and expense management tool for travelers, allowing users to add multiple trips and track live expenses throughout their journey. The platform supports both domestic and international travel with live currency rate conversion, and stores data until the user logs out.
